Excellent relationship with carrier partners for all out-bound cargo from UAE

Expertise in handling project cargo, over-length, dangerous cargo, temperature items and exhibition cargo

Customs Clearance

Pro Global Logistics LLC.

At PGL, we prioritize the swift and efficient clearance of reefer containers, particularly for food items. While the standard customs clearance process typically spans 24 to 48 hours, our proactive approach enables us to achieve a turnaround time of approximately 12 hours.

Our Key Strategies Include:

Pre-Clearance Arrangements: We initiate pre-clearance procedures for food shipments to expedite the process and mitigate potential delays. clearance of reefer containers particularly for **FMCG and PHARAMCUTECALS**

Advance HS Code Verification: For new or unfamiliar items, we proactively consult with Dubai Customs to obtain HS Code approvals before shipment arrival, ensuring compliance and preventing clearance disruptions.

FTA TRN Linking: We ensure that our Customs Registration Number (CRN) is linked to our Federal Tax Authority (FTA) Tax Registration Number (TRN) to facilitate VAT-exempt customs clearance.

وزارة الخارجية
والتعاون الدولي
MINISTRY OF FOREIGN AFFAIRS
& INTERNATIONAL COOPERATION

MOFAIC attestation is the process of verifying the authenticity of official documents by the UAE Ministry of Foreign Affairs and International Cooperation. It is a mandatory step for validating documents such as educational certificates, marriage or birth certificates, and commercial papers for use in the UAE or abroad

FMCG and F&B : labelling and date-coding in UAE

LABELLING REQUIREMENTS

01

Language: Labels must be in Arabic. While bilingual labels (Arabic and English) are common, Arabic should be the primary language, and its font size should not be smaller than the English text.

DATE CODING STANDARDS

02

Format:

For products with a shelf life of 3 months or less: Day/Month/Year (e.g., 11/06/2025)

For products with a shelf life longer than 3 months: Month/Year (e.g., 06/2025)

Language: Dates can be printed in Arabic or English. If both languages are used, the dates must be identical in both languages.

COMPLIANCE AND APPROVAL

03

Regulatory Authorities: The Dubai Municipality oversees food labelling regulations in Dubai.

Approval Process: Before importing products into the UAE, businesses must submit product labels for approval. This ensures that all labelling requirements are met and helps prevent delays at customs.

Our Labeling and Date-Coding Services Include:

Fast Turnaround: We process labeling and date-coding within 48 hours of delivery, ensuring timely readiness for distribution.

Compliance with UAE Regulations: All labels are prepared in accordance with UAE food labeling standards, including bilingual Arabic/English labels, and accurate production and expiration dates formatted as day/month/year for products with a shelf life of three months or less, or month/year for longer shelf lives.

Halal Certification: For applicable products, we ensure that halal certification is clearly indicated on the label, accompanied by the necessary documentation.

Batch and Lot Numbering: Each product is assigned a unique batch or lot number for traceability, enhancing supply chain transparency.

Storage and Handling Instructions: Where applicable, we include specific storage and handling instructions to maintain product integrity.

Date Coding: Production and expiry dates must be printed directly on the original packaging using indelible ink. Stickers are not accepted for date coding.

Specialised Service For F & B

Pro Global Logistics LLC.

Currently we handle the labeling and date-coding for various brands with

**TURNAROUND
TIME OF 48 HOURS
AFTER DELIVERY.**

Buyer Consolidation

Buyer consolidation (also known as cargo consolidation or freight consolidation) is a logistics strategy where a freight forwarder or logistics provider combines multiple smaller shipments from different suppliers—often all destined for the same buyer—into a single, larger shipment.

Purpose

To reduce shipping costs and improve efficiency.

How it works

Instead of shipping multiple small loads separately (which is expensive and inefficient), the shipments are **consolidated** at a central warehouse or hub.

End Result

A single full-container load (FCL) or fewer shipments that are easier and cheaper to manage
